Enjoy Yummy Kebabs and Different Taste of Coffee by Skewer by [James Blee](#)

Article published on January 20th 2012 | [Food](#)

In this winter, it is great to have some chat sessions with friends or relatives sitting near the fireplace. To continue a good chat session, food and beverages is really important. What better can be part of these chat sessions than hot kebabs and steamy coffee. To enjoy the yummy taste of the kebabs, what is really important is proper grilling of the meats.

Skewer is a long stick that is used to hold the pieces of meat when they are grilled. It can be made from both wood and metals as desired. Both these items can be easily found in the market and what more is that it can be a great asset for any kitchen. There are some distinct advantages of the metal varieties over the wooden ones. Made from stainless steel, the metal skewer are more user-friendly. Their longevity is more than the wooden counterparts and are more resistant to flames. There are certain special methods for using the wooden skewer. Although bamboo is its chief ingredient, they can't be directly exposed to flames..

The skewer can also be effectively used as a turkish coffee maker. The taste of coffee produced in this fashion is distinctly different from the coffee made via normal procedure. The coffee is directly prepared from the coffee beans. The difference in taste is due to the difference in the way of preparation. This taste is well liked by the people all over the world and thus its popularity among the masses has no bounds. It can be used with Briki or Cezve to prepare the coffee which are the two commonest and most conventional items used to prepare coffee..
