Keep Your Trees Alive and Kicking by [Peter Carlyon](#)

Article published on August 10th 2012 | [Gardening](#)

Trees are the fountainhead for life and they are the ones which keep the ecological balance on earth sustained without human interference. It is important that we choose to grow them in our backyard because they will become our lifelong companion and would will our solitary moments with happy thoughts when we are alone. Trees also look appealing if they are kept the right way and it is vital to pay attention to them because then only they can live for years and fill your deck with their brown dead leaves.

If you have trees around your home and you love to sit in their shade and enjoy your weekends then you should certainly care for them. Watering them and keeping them fed with manure is alright but your favorite tree might ask for more than that. Hence it is important that you get it checked by tree surgeons in Bristol and they will keep you tree alive and kicking for decades to come. Let us learn some of the way that they employ.

Pruning

When you approach a provider for tree surgery in Bristol they will offer you pruning as a treatment to keep your trees healthy. This method is also called Pollarding and it is plays a keen role in keeping the growth of a tree in check and maintaining its health. Under this, the old shoots and infected areas of the bark are removed and then the tree is fixed with some healing material which keeps the pests away. This way the tree enjoys its growth and you can see it shooting new branches within weeks. Tree surgeons in Bristol consider this as the basic way of tree care.

Crown Thinning

Trees need light to survive and if the crown of the trees in your backyard has grown thick then you might have to hire experts for thinning it. The tree surgeons in Bristol specialize in this task and thin the tree in right proportion in accordance to the value of the tree. Once done the tree branches more light and air so you can see your tree rejoicing. Removal of dead shoots, branches and leaves is also a part of the process so crowning works in many ways to keep the tree healthy. So if you are thinking of opting for tree surgery in Bristol you should go online and browse the various options present on it.
