Types of laptop batteries by [James Blee](#)

Article published on February 22nd 2012 | [Hardware](#)

Different types of laptop batteries include Nickel Cadmium batteries, Nickel Metal Hydride battery and Lithium Ion Battery.

Nickel Cadmium – These were introduced first and are preferred for its rechargeable quality. They can be produced at a low cost. Hence, all laptop batteries manufacturers prefer producing such batteries. These batteries are cost effective, they can be easily manufactured at a low expense and they provide heavy output for years. But in recent time, even after having such great qualities, these batteries are not regularly used..

Nickel Metal Hydride – Nickel metal hydride laptop batteries are available in all places. These batteries are mostly used with the older version of laptops. But the new technology used in this NiMH batteries help it now to perfectly fix with the modern day laptops and notebooks. These are batteries are reliable and support high out than the earlier ones. The best part is that, these laptop batteries can be easily produced at a cheap rate. These are very safe and support laptop usage for hours.

Lithium Ion – These batteries are fitted in the new laptops. These do not have memory affect like its predecessors namely the Nickel metal hydride laptop batteries. These are also lighter than the other two, hence can be easily carried from one end to the other. Today lithium batteries are the most popular ones, and are widely used y all laptop users. In spite of being the costliest batteries, people prefer this one for better performance and support.

Buy a longer laptop battery

Do spend a little more and invest in a good quality laptop battery, so that you do not face trouble while using it. As you know these batteries are not cheap, hence do not even look for short cuts or else it will affect your machine badly. Invest in a perfect battery that will suit your laptop so that you can work effortlessly.
