Advantages of Using the Pinhole Glasses by [Julia Roger](#)

Article published on December 6th 2011 | [Health](#)

As we become older, our eyesight can decrease. In modern days of TVs, laptops, computers, even young kids and teenagers are facing problems with their vision. So comes the need to use lenses to correct our vision problems. There are convex or concave lenses that are most commonly used but people are always on the hunt for better solutions. Use of pinhole glasses is a revolutionary development in this matter. Although it may sound strange to too many, these glasses can rectify your vision imperfections almost readily without the use of the lenses, which can be quite heavier. Consistent use of the pinhole glasses for some time will surely recover your eyesight.

Doctors have found thorough research that the pinhole glasses have the capabilities ability to end your vision problems through researches. There is a very simple method that has led to the development of these glasses. Anybody can find the result of this process. We need to shut one of the eyes and place a fist on the other eye. The fist should be opened to produce only a small peeking hole. In most cases people with hazy vision are able to view any object clearly at this moment. This is the working principle of the pinhole glasses, which actually have plastic or metal as their chief ingredients. The pinhole permits only a small amount of light to enter to the eyes. There is only a single focal point for the eye muscles and the object is clearly visible to the retina.

The advantages of using the pinhole glasses are many. In this modern world, television and computer syndrome with the symptoms of eyestrain, dry eyes, headache, fatigue and blurry or double vision is quite common. Improving the eyes focus, can help us to get relieve from these symptom. Using it consistently for just 15 minutes per day can cause great results for your otherwise ailing eyes.
