An Ultimate Adhesive Solution for Denture Slips by [Justin Bayer](#)

Article published on March 28th 2012 | [Health](#)

Are you the one using a denture and have been facing embarrassing moments when your denture slips or moves while you are eating your food. Then you got to try the Secure Denture Adhesive Cream.

Secure is the best denture cream and its waterproof for 12-Hour Hold Power. It is a zinc free denture cream which is 100% free of taste, so it doesn't alter the taste of food. Plus -- since the adhesive doesn't dissolve in water -- you won't experience the unpleasant sensation of adhesive particles leaking out of your dentures and into your stomach.

Conventional adhesives work by thickening saliva to improve suction between the denture and the gum. The dentures hold only by suction. Being water-soluble, these fixatives can dissolve and wash away when you're eating and drinking, causing dentures to slip and slide. Zinc is an important ingredient in making this work. Secure Denture Adhesive Cream is different. It doesn't need Zinc to work. Its patented waterproof adhesive won't wash away while you are eating or drinking. Instead, it creates a strong, long-lasting bond between the denture and the gum. It holds so effectively, it prevents slipping and sliding all day -- up to 12 hours.

Just one application per day of Secure Denture Adhesive cream is what you need. Thus, it's not only safe but economical too. This denture adhesive cream is applied sparingly on the denture, hence the tube lasts longer. Secure is made from ingredients used in the base of many chewing gums. This zinc free denture cream does not wind up in the stomach and has no taste, so doesn't spoil the food taste. Also you need not worry about your denture losing its grip and slipping.

We are Bioforce USA, an industry leader in distinguished natural lifestyle products. Our mission is to bring you natural health care products from Europe that provides the highest level of quality, effectiveness and safety available today. The products that we offer have the finest natural ingredients and outstanding performance. We have the clinical research as proof of efficacy.

Secure denture adhesive products meet all these strict standards therefore Bioforce U.S. has become the sole distributor for Secure. Ingredients of Secure Denture Adhesive are as follows:

Miglyol (derived from Glycerin)

Polyvinyl Acetate (non water-soluble ingredient used as the base in many chewing gums)

Sodium Carboxymethylcellulose (derived from tree bark)

Other products from Europe that we have to offer are Alfred Vogel herbal supplements made in Switzerland with fresh, organically grown plants, Herbtint Hair Color from Italy, the natural alternative to conventional hair dyes and Sanhelios high-potency herbal supplements.
