Botox and Nose Surgery are the most preferred cosmetic surgery in Toronto by [Torontofacialplastic](#)

Article published on December 1st 2011 | [Health](#)

Not only Canadians but, we all want to look beautiful and thrive to get compliments on our looks. But due to aging or under certain circumstances, our facial contour changes either due to fat deposition or wrinkles. But, with the availability of cosmetic surgery, getting back a youthful look is no big deal.

Talking about cosmetic surgery in Canada, Toronto the cultural, entertainment and financial capital of this country, is the hub of cosmetic surgery. Recent studies have shown a huge increase in the number of individuals undergoing Cosmetic Surgery In Toronto. To be precise the most operated cosmetic surgery here are Nose Surgery and Botox In Toronto.

To start with, Botox is Botulinum toxin, which is usually a protein, released by the bacterium *Clostridium botulinum*. It is also known as Xeomin or Dysport and is one of the most powerful neurotoxin. This category of protein is mainly used to treat several facial structural imbalances. Wrinkles between the eyebrows, forehead wrinkles, wrinkles around the mouth, crow's feet, etc. are usually removed by using Botox In Toronto.

Botox is usually injected into the facial tissue using a very fine needle as thin as a human hair. This highly purified protein blocks the release of the neurotransmitter that connects nerves to muscles. This helps the muscle to avoid getting contracted and thus goes into a relaxed state. But as this is not that easy procedure, therefore you should consult the best Cosmetic Surgeon In Toronto.

Now coming to the nose surgery, medically it is also known as Rhinoplasty. Cosmetic surgeons perform Rhinoplasty to bring a natural balance on the beauty of the nose and the eyes. Nose Surgery In Toronto has recently increased in the last few years as most of the people are going under scissors to get a beautiful nose.

The nose comprises bone, cartilage and skin. In Rhinoplasty the cartilage and the bone is trimmed to give a new contour to the nose. Truly speaking, surgeons take around 2 to 5 hours to perform this surgery and depending on the surgery anesthesia are provided. Nose surgery is one of the complex cosmetic surgery available at present, hence requires expert advice of the best Cosmetic Surgeon In Toronto.

Cosmetic surgery may make you look beautiful but not to forget it too comes with several complications and side effects. Hence when you decide to go under scissors, remember to choose the best surgeon in the field. It will be wise to choose the practitioner who has been into the business for a longer period. Besides, you should also check the portfolio of his clients from where you will get an idea about his work quality.
