Civet Coffee a sip of good health, great flavor and amazing aroma by [Ashish Pandey](#)

Article published on February 2nd 2012 | [Health](#)

The Civet Coffee has its roots back in the historical cultivation of this plant in Indonesia. With the dawn of the 18th century, commercial plantation of civet coffee began in Sumatra and Java, thanks to the Dutch! This special coffee is thus produced by collecting the natural coffee beans from Kopi Luwak, Indonesia. Coffee Luwak is therefore quite a popular form of coffee that is admired by thousands of people all over the world. A part of its popularity is also attributed to its feature in one of the most popular US flicks, "The Bucket List"™. The actor, Jack Nicholas, a billionaire is seen sipping coffee Luwak throughout the movie, which made Civet coffee even more renowned.

Though the very genuine taste and aroma of the civet coffee can be experienced in Vietnam, but elsewhere in Indonesia and on the online sites, you can find people selling almost twin or genuine coffee Luwak. Infact, there are certain websites that are even selling coffee Luwak by directly buying the coffee beans from the farmers working in coffee plantations in Kopi Luwak. People, who are reading about civet coffee for the very first time, might not even know the benefits of this coffee. This coffee has a specialty of treating various diseases and is also otherwise great for overall well being. Among various health benefits of coffee Luwak, the most common ones include protection of teeth, prevention of nerve pain, lowered perils of breast cancer, prevention of gall stone, protection of skin and prevention of diabetes. Considering the medicinal properties of civet coffee, even the scientific studies have been performed on it. Infact, scientific studies reveal that apart from therapeutic qualities of this coffee, the flavor elements of coffee Luwak make it 30% better, tastier and aromatic than any other regular coffee that you sip.

Also, civet coffee produced by the natural coffee beans found in Kopi Luwak is far more hygienic than regular coffee, especially because of the absence of harmful bacteria e-coli. Infact, this coffee is so beneficial and is produced in such a natural way that it is often also called "black gold". Coffee Luwak is produced manually and lacks harmful properties. More than anything, this Arabia coffee is a specialized kind of coffee that can be very good for your overall well being, while also adding special elements of flavor and aroma in your diet. Brewing this civet coffee that comes directly from the Kopi Luwak fields can be absolutely great and can add a special touch of good health too. However, though Kopi Luwak coffee is quite popular, but it is also true that all the producers cannot be relied. Therefore you need to search for those producers who can be relied for genuine civet coffee. Some of the producers blend civet coffee with any other regular coffee to make it cheaper. Make sure that you know about these producers.

Genuine producers can offer you valuable Luwak coffee and can thus offer you real civet coffee mystique along with other advantages!
