Cordyceps is a fungus that is used because of its various benefits.

### About Cordyceps:

Cordyceps is an outstanding example of what nature can do. Cordyceps Sinensis starts its lifecycle being a worm which crawls on the land and this happens in winters. Then in summers this Cordyceps becomes a plant, particularly mushroom. Is not that something strange? Yes, but it does happen in reality. This may be troubling for the insects like ants and the caterpillars but for human beings this fungus is of great help. Cordyceps Sinensis is a medicinal mushroom. And it contains ingredients that are beneficial in fighting with some diseases and protecting humans from getting ill. Benefits of Cordyceps Sinensis were discovered a lot many years ago in China. It has properties that can be used to fight against the diseases like cancer. It also has anti inflammatory and anti oxidant properties that prove to be very useful in boosting the immune system of the human body. Therefore it can also be used to maintain the overall health of the human being. The best application that has been discovered about it is that it can also be used for slowing down of the aging of the human being. It is something all of us desire and thus it may let you look young for longer time. They do not taste good and hence everyone usually resists having it but it is available in tablets and capsules so it is not that tough to consume it. For so many benefits out of which each one is really needed by all the concerning people, a bad taste is not something they can't pay for. Plus in capsule form you may not find any trouble. You just need to get a doctor's prescription and thus you just need to consume it to get the best results, even more than what you expect out of it. It is found mainly in the eastern countries and is used in countries like China.

### Main benefits:

This fungus actually protects you from not just one, but many troubles. Some of them are diabetes. Extracts of Cordyceps have polysaccharides, this has properties of being anti oxidant, and this helps controlling the metabolism of the glucose and an increase in the sensitivity to insulin. It also cures respiratory ailments by relaxing the walls of the bronchitis. It also maintains a good balance in the circulatory system of the blood. It thus prevents the bleedings that take place internally. Therefore it plays a vital role in curing various problems related to lungs, kidneys and liver. Problems like reduced heartbeat are also dealt by this fungus. With so many troubles being tackled by a single medicinal plant, this makes it very easy to choose what you need whenever one is in trouble. Further, the immune system balancing is the main function that it does. With all these, it is very important to know the benefits of it and prescribe it even to the other fellows you know. Cordyceps also enhances the production of the cells in our body; hence it is widely used in various part of the world.
