Dr. Rabinowitz's cosmetic dentistry services include:

Veneers

Porcelain veneers are a very popular way to improve the appearance of your smile. Veneers are very versatile as they permit Dr. Rabinowitz to reformulate the shape, contours and color of teeth. Using veneers can hide ugly gaps between teeth, cover over stained or discolored teeth and hide teeth that are crooked or misshapen. Veneers are thin but rugged porcelain shells that are permanently affixed to your natural teeth.

Bonding

Using modern bonding technology allows Dr. Rabinowitz to add small amount of a tooth like substance around the surfaces of misshapen or misaligned teeth. He then sculpts the material to close gaps or reshape teeth. When finished the bonding looks lifelike and natural. One thing to note about bonding is that it is not as durable as veneers.

Teeth Whitening

Very few things are more effective for achieving immediate cosmetic improvement in your smile than having your teeth whitened at our office. Dr. Rabinowitz chooses the most effective whitening system to improve your smile.

Invisible Braces

Crooked teeth can be unsightly, but most adults will not put up with the appearance of traditional braces, the hassle of having to come in to have them tightened and the annoying pain that adjustments cause. Dr. Rabinowitz offers his patients the option of invisible braces that gently bring teeth into line without the appearance of metal braces and their accompanying drawbacks.

Here we have just highlighted some of the more common things done in office for cosmetic dentistry. Dr. Rabinowitz has many other tools for specific problems. Dr. Rabinowitz's office will give you a smile you will love to flash. We promise.
