Dr. Farella | Rhinoplasty Westchester by [Dr John F Farella](#)

Article published on March 1st 2012 | [Health](#)

I had always been self conscious of my nose growing up, but never gave rhinoplasty much thought. It seemed like a far-fetched procedure for someone young and busy like me, considering I was only home for very short periods of time throughout the year. Not to mention the thought of putting my appearance in the hands of someone else was frightening. However, if there were one surgeon I trusted more than anyone, it would be Dr. Farella. Both my mother and I have gone to him for many years for smaller procedures such as laser hair removal, chemical peels, so on, and have always gotten great results. Not only does he take his time with his work, but he also takes his time listening to what I have to say, which is a quality a lot of doctors seem to lack in their hectic days. When I was finally ready to do something about my nose, I knew Dr. Farella was the surgeon Iâ€™d go to. He listened to everything I had to say, gave me all the information I needed to know, and promised me heâ€™d do a great job. Wellâ€he did more than a great job. I had a smooth surgery, easy, short recovery and could already see the results in the first few days. I had the procedure done over winter break and only told two of my closest friends. One of my biggest concerns going into the surgery was making sure that my nose was different, but not so different that it was obvious I had gotten surgery. It has been a year since my surgery and I can honestly say that not one person has ever made a comment about my nose looking different, but almost everyone has told me â€œYou look great! What have you changed?â€• I smile and just tell them I bought new makeup! My nose turned out better than I could have ever imagined. It looks natural and fits perfectly with all my other facial features...it truly is a work of art! I have more confidence than Iâ€™ve ever had, and could not thank him enough for what he has done. He has really changed my life!
