Felt fresh and Comfortable all day long by wearing 1-DAY ACUVUE MOIST - the Comfortable Contacts Exclusively at Lenstrade by [Lenstrade](#)

Article published on July 6th 2012 | [Health](#)

1-DAY ACUVUE MOIST contact lenses by Johnson and Johnson with LACREON Technology are the most healthy and convenient way to wear contact lenses.

LACREON Technology permanently embeds a moisture-rich ingredient directly into the lens surface creating a cushion of moisture, similar to that found in natural tears, that won't blink away. That means the lens stay smooth for a fresh lens feeling and even more end of day comfort.

1 Day Acuvue Moist contact lenses from Johnson & Johnson are the premium daily contact lenses. With the convenience of no solutions and no lens cases, also have innovative BLINK STABILIZED lens design and the exceptional comfort of LACREON Technology. These contact lenses offer the highest level of comfort available in this type of lens. It gives you consistently clear and comfortable vision from the moment you put them in, to the moment you toss them at the end of the day.

Blink Stabilized lens design helps keep the vision crisp, clear and stable all day long - even for people with an active lifestyle.

Blink Stabilized lens design helps minimize shifting and contact lens rotation by realigning naturally with every blink. Contacts with Blink Stabilized design also feature four zones of stability, instead of the single ballast zone found in most astigmatic contact lenses. The result is exceptional stability and crisp vision and makes 1 Day Acuvue moist so special and unique from others.

“No solution is the best solution” hence hassle free with exceptional comfort. These contact lenses are perfect for daily wear, occasional wear or just in case you suffer from allergies that may cause discomfort in re-using contact lenses. Recommended to be removed and discarded daily.

For allergy sufferers, clinical research has shown that a fresh pair of contact lenses every day (made from etafilcon A) may provide improved comfort for people suffering from mild discomfort and/or itching associated with allergies while wearing contacts, compared to lenses replaced at intervals of greater than two weeks.

1 Day Acuvue Moist contacts are a convenient way to wear your contacts – just wear them one day and throw them away! A breakthrough in daily disposable contacts, 77% of wearers report that these contact lenses "felt fresh and new all day long". Enjoy the feeling of a fresh, clean contact lens every day with 1 Day Acuvue Moist from Johnson and Johnson.

It offers best in Class UV protection. UV radiation can be harmful to your eyes. That's why 1- Day Acuvue Moist brand helps protect the covered portions of your eyes by blocking at least 82% of UV-A radiation and 97% of UV-B radiation from the sun. It has Visibility tint & inside out mark also.

Available in the pack of 30 lenses per box for just Rs. 1600/- and 90 lenses per box for Rs. 4200/- in India.

Now days , there is an increase in the number of patients who prefer to use contact lenses instead of spectacles. This option is cosmetically appealing. There are several types of contact lenses including monthly and daily disposable ones. The daily disposable contact lenses like 1 Day Acuvue Moist are very easy to use and do not need daily maintenance required for monthly disposable lenses.

1 Day Acuvue Moist is the popular contact lens from Johnson & Johnson Vision Care. These lenses are preferred by a majority of patients for correcting refractive errors. Patients suffering from myopia or hyperopia can use these lenses for getting clean and clear vision. These are daily disposable lenses. It gives freedom to patients from the daily cleaning and maintenance of the lenses. They are extremely soft and comfortable to use. Made by using Lacreon technology, these lenses guarantee healthy and fresh eyes with full day comfort. The high water content of these lenses prevents dryness of the eyes. These lenses also provide protection from the hazards of UV radiation. Perfect for people who are nearsighted, farsighted or have astigmatism.
