Laser Hair Removal Procedure for Women and Men in Boca Raton, FL by [Lauri Hersh](#)

Article published on April 23rd 2012 | [Health](#)

The days of painful hair removal methods have passed away as Boca Raton FL and the rest of the world experience painless procedures via laser hair removal. Men can be more comfortable with their preferred clean physique, while women can feel free to dress in any kind of apparel without the need to stress about persistent hair growth.

Laser hair removal fully gets rid of unwanted hair through regular treatment. Compared to tweezing, waxing, and shaving, it lets patients avoid the hassle of burns, nicks, and bumps. Body parts such as the face, underarms, arms, legs, and bikini line are standard spots for laser hair removal among women. For men, they generally go through this type of process to clear out back and chest hair.

Laser is incredibly accurate and can target coarse, dark growths while leaving the skin unscathed. It'll only take a part of a second when treating numerous follicles simultaneously. Most significantly, laser hair removal procedures produce long-term and satisfying outcomes. Both men and women can surely reap the benefits of such procedures, permitting them to feel much better no matter what they wear.

Prior to the treatment, the skin of the patient will be washed and cleaned with alcohol. He or she and the doctor will have to wear safety goggles to shield their eyes from the laser. The proper laser light energy configurations will be placed based on his/her pigmentation level and the level of sensitivity of the particular spot.

Boca Raton laser hair removal involves laser being absorbed by the pigment within hair follicles. Laser throbs to vaporize the pigment, debilitating follicles and suppressing hair growth. With the most advanced laser technology Boca Raton medical practitioners are offering, patients can go for quality laser hair removal treatments.

Even though the laser hair removal Boca Raton doctors carry out might make patients sense a light, tingling, or warm sensation, the dynamic cooling device (DCD) integrated in the laser allows them to have a comfortable treatment. As certain parts of the body tend to be more sensitive than others, topical anesthesia is utilized to mitigate patients' pain and discomfort when delicate areas are selected for the procedure.

People can benefit from having the type of skin that's so smooth with the help of Boca Raton laser hair removal techniques. Additionally, they can choose Boca Raton liposuction that targets particular body parts that they want to get shaped for a more appealing body shape.
