Plastic surgery is getting increasingly popular in Dallas given the amazing aesthetic improvements it promises of. The Plastic surgeon Dallas specialists are well versed in different techniques of plastic/cosmetic surgery that can enhance your entire portfolio boosting up your self-esteem by a great extent. Here follows a short brief on the most major forms of plastic surgery Dallas procedures.

## Breast Augmentation:

Breast augmentation Dallas is one of the most popular forms of plastic surgery here. Every woman desires for a wonderfully curved build but not everyone is fortunate enough to achieve that naturally. In such a situation the artificial breast augmentation helps a lot to obtain that coveted cup size. It is also called breast implantation at times as a synthetic implant is utilized to enhance the bust size. The implants could be made of either silicone or saline.

## Breast Reduction:

Breast Reduction Dallas is also common. There are many women out there who are suffering varied problems due to a much heavier bosom - a breast reduction surgery here would help them to get rid of the typical associated issues with the problem such as neck & back pain, brassier strap grooves & breathing troubles. An average cost of the process is approximately 7,000 USD.

## Abdominoplasty:

Abdominoplasty Dallas is also tummy tuck Dallas and is highly common here. The process involves reduction of excess fat and skin that has formed due to terrible weight gain or pregnancy and refuses to go easily from the abdomen. The surgery creates a solid abdominal wall with the abdominal muscles allowing the patients to achieve their desired flatter belly. However, the surgery is most likely to leave a prominent scar near the hip which will take a year to recover completely.

## Liposuction:

Liposuction Dallas is another routine cosmetic surgery here undertaken by many celebrities and the common residents too. It's also called body contouring and can be claimed as the most regular plastic surgery performed in States. The surgery involves using a big hollow needle to suck up the excessive body fat. However, it's to be mentioned that the process is not for the obese patients but for healthy and stable weight individuals. It's usually concentrated around the buttocks, hips, abdomen and thighs and can be of two types like ultrasonic and tumescent.

## Rhinoplasty:

Rhinoplasty Dallas is utilized for reshaping the nose. The surgery can help in nose reconstruction, rectification of any birth defect in the nose area and can also eliminate the breathing troubles caused due to nasal defects. Many people take the help of rhinoplasty to enhance the beauty of their nose making it more appealing.
