Rhinoplasty: Best Procedure to Correct Your Nose Shape by [Alex Taylor](#)

Article published on December 16th 2011 | [Health](#)

Nose job cosmetic surgeries, also known as rhinoplasty are very common these days; as people don't settle for looks they don't like, and flat nose is one those. The nose cosmetic surgery not only makes your nose beautiful, but it also helps in rectifying nasal tract disorders. As a matter of fact in some cases the defect in the nose might cause the patient breathing problems where the nose surgery actually helps in solving the problem.

The patient must be at least 16 years old in order to undergo nose surgery in Sydney. The patient should be examined before having the nose job in a professional cosmetic clinic in Australia. If everything seems normal; then it can be decided if he/she is compatible for the nose job surgery or not! In most of the cases, the patient needs rest for a few days after the surgery as the nose gets swollen. In some cases, there might be septal deviation of the nose, and the patient might feel nauseas and weak and may have breathing problems since he has to breathe through the mouth only. Such type of operation normally takes around one hour. The swelling in the nose can stay up to several months before the nose is back to its corrected size.

The cosmetic nose surgery can be performed with a local anesthesia or a general anesthesia. The surgery is performed from within the nose so that the cut marks won't be visible outwardly. After the surgery is done, the patient has to bear a swollen nose for quite a while which might be a little uncomfortable. The patient may need to wear bandage for a few days to few weeks depending upon the extent of dissection. Finally, the patient needs to get used to the new look which might be a little bizarre at first.

The nose job plastic surgery is a life changing procedure for many people in Sydney. It would be best to talk to people who had this surgery before and ask them anything you can think of about how they felt before the surgery, while having it, and after the surgery before you consider having the procedure. You can ask them for references of clinics and plastic surgeon that are best in the business. You can also learn how it changed their lives in a good or bad way.

Before having rhinoplasty you need to ask as many questions as you can. Ask the doctor about what you can do in order to prevent having any problems and also ask about the complications may rise from nose job surgery. Make sure you get the best doctor surgeon you can find in order to perform the surgery and get the best results as well as ensure that you know exactly how you want to look after the surgery.
