What are the benefits of Moringa oleifera by [Baterna Farms2](#)

Article published on July 23rd 2012 | [Health](#)

People who are not aware well aware of the advantages of Moringa oliefera tends to question me about the benefits of the Moring, so the first thing I use to ask them is does they have done any research on it before asking me this question and to my amaze most of them havenâ€™t or in case someone has done it is not appropriate.

So I have decided to let me briefly describe some uses of the Moringa Oliefera and why it is called a Miracle tree? Well first of all the best and the most important use that I like is its ease to grow and this is not only it but it is very fast growing plant, it can even grow up to 20 feet long in a single year.

Then the most delicious part that is considered to be the most favorite part in the whole moringa tree even if you like you can eat them naturally in the raw form, beside it is the best way to eat the leaves as well and the good thing is that if you want you can take the leaf of this Miracle tree for eating purpose as early as 6 weeks. But there is a slight problem that you wonâ€™t be having much leaves to eat. The special thing about the leaves is that they grow clean and requires minimal rinsing if you are taking them in bulk for meal.

Moringa is heat loving plant so the best time to grow is in summer, where the weather is extreme cold but those geographical areas that have hot temperature or moderate temperature can grow them all year long.

The most important fact that is even proven scientifically that Moringa oliefera is the best nutritional source as compared to all other green plants. Further it is good for all age people. If you want to stay fresh or in other words if you intend to stay energetic all day this Miracle tree can help you lot in this regard.

According to world Health organization people who are poor should grow this miracle tree as it can help people recover from the lack of nutrition fact. Because Moringa tree can help them get their desire nutrition at very affordable cost. The scent of the tree is like roasted nut; its leaf is lush green with white flowers. There are some things that should be taken care of that is, flowers and buds should not be eaten raw like the leaves.

If you still want to find something interesting about moringa or you are anticipating to give it a try you can find it on [ww.baternaafarms.com](http://www.baternaafarms.com)
