They enable you to sit down, make you appear alluring (femme-wise), and break your fall when somebody takes your chair away just when you are about to sit. These are recognized together as the "butt," which is composed of the gluteus muscles: gluteus minimus muscle, gluteus medius muscle, and gluteus maximus muscle. Like the entire body, it is likewise a spot plastic surgical procedure touches.

The Brazilian butt lift is performed to make the buttocks look bigger for a sexier and plumper look by sucking fat from other areas of the body, typically working in tandem with liposuction, and introducing it into the buttocks. Although both ladies and men are eligible for a Brazilian butt lift, nearly all who undertake this technique - nine out of 10 - states the American Society of Plastic Surgeons (ASPS), are females. Just what are their reasons for obtaining a butt lift?

The "bomb": Men like women with well-formed bodies and large buttocks, period. This can be a quite well-known picture in popular culture (movies, fiction, general fiction): women who are gifted with large breasts and butts are the apples of the men's eyes. Andrew Clark of Bristol University stated that big buttocks have been favored throughout history, even with the Renaissance people.

Then again, Clark also emphasizes that for the butt to be thought as good-looking it must not only be large, it has to be well-shaped too. In his study published on The Sun in 2009, he used singer and actress Jennifer Lopez as an example. His assessment of the star's photos during the latter's vacation in Italy reinforces the reality that shape is crucial, whether for big or small butts.

The fad: For most regions of the globe, together with the U.S., huge butts are a popular sight. Clark says large buttocks are a normal trend in the Americas, Europe, and U.K.; though not usually in East Asia where women's butts are relatively smaller. Take it from stars like Beyonce and Kelly Brook to show that there is certainly nothing to be ashamed of in possessing a huge butt. Actually, together with Botox, Brazilian butt lift has seen its share of recognition.

The butt lift is taking almost every state in the U.S. by storm, similar to the Botox Los Angeles has to offer. Statistics from the ASPS revealed that patients splurged about \$13 million on butt lifts in 2009 alone. With huge butts trending as of today, patients opting for butt lifts could soar in the coming years.

You can read more on Clark's analysis on "rear-lativity" at The Sun online at [TheSun.co.uk](#). Also check out [YourGuidetoPlasticSurgery.com](#) for additional information on cosmetic surgeries like Los Angeles Botox and butt lifts.
