You are Allergic by [Andy](#)

Article published on January 12th 2012 | [Health](#)

Sneezing, running nose, itching eyes are some of the common behavior for people who are allergic. Yes, allergy can be a reason for your frequent session of sneeze and watering eye. Allergy towards dust particle or some foreign particle or even food can be a reason why you suddenly start sneezing and coughing in an uncontrolled way without any reason.

The reason behind is your being allergic. Does it happens to you that you have uncontrolled sneeze after eating something? Your nose starts running and you start wheezing after a cleaning session in your house? Your eyes start itching and you start sneezing as you come towards traffic or say as you come near any dusty area? Your yes, to all the above question can clearly give you hint that you are allergic to some of the things and situations.

As you come in contact or say in collision with any dust or foreign particle you immediately start sneezing, coughing, itching your eyes, in many serious cases you will have rashes on your body, sometimes reddening of skin with itchy sensation all over the body are some of the points which proves that you are allergic and you need to be treated by a allergist. In places like Delhi which is so much full of pollution and population it is really not a big deal if you are allergic because there is so much of impurity and pollution and dust all over that you cannot spare yourself from being allergic.

But it's not easy to find a good doctor in such gigantic city that to if you start finding a doctor in eleventh hour. But on a good chance there are numbers of good allergists available in Delhi region for our help such as allergists in saket, allergists in Delhi and allergists in dwarka who are ready to help you out in cure and treatment of allergy. An allergy is a hypersensitivity disorder of the immune system. Allergic reactions occur when a person's immune system reacts to normally harmless substances in the environment. A substance that causes a reaction is called an allergen.

These reactions are acquired, predictable, and rapid. The person specialized in medical science of allergy and can treat and prescribe medication for its cure is known as allergist. Allergist asks your symptoms of allergy which gives you trouble and even try to know when you have allergic attack means in which situation and after incurring all about the allergic symptoms allergist starts with treatment; either he suggest avoiding certain things and situation or he give medication to cure allergy. It is always better to get your allergy cured before it becomes a big problem and become a painful ailment.
