Electric Gates – an ideal safety solution for any home [James Blee](#)

Article published on June 18th 2012 | [Home](#)

There is nothing more annoying than having to struggle with driveway gates when it is pouring down with rain or freezing cold and you want to get indoors, but having Electric Gates which can conveniently be opened while people are still in their vehicle is a great solution which is ideal for all kinds of homes.

As well as being brilliantly convenient, electric gates look stylish at the end of any drive and are also a sensible security solution which can help ensure that no unwanted visitors or would be thieves gain access to a property or the land around it.

Convenience is key when it comes to buying electric gates, and the right electric gates will be easy to use and able to be fitted to any size of drive. As well as this, electric gates should look stylish and in keeping with the look of a property, and buyers should also make sure they opt for electric gates which are going to be durable and offer high performance for years.

If you are looking for electric gates then visit us here at Jay Mac One Stop Security Shop and browse through the wide selection of electric gates we have on offer. Our electric gates are available in two styles – sliding and swing – and this gives our electric gates buyers the chance to invest in electric gates which are going to be most suitable for their driveway.

Those buying our electric gates can also choose between wooden and metal options, ensuring that electric gates are in keeping with the style and period of a home and are suitable for the personal taste of the customer.

Our sliding electric gates are the best choice for those who do not have the space at the end of their driveway for electric gates to open, and these are some of our most popular options. Our sliding electric gates range includes wrought iron electric gates, hardwood electric gates, haras electric gates and Palisade electric sliding gates.

Those with more space to play around with could be interested in our swing electric gates, which are available in Palisade, mesh, wrought iron and hardwood styles.
