Consider a loft conversion for your home by [Wade Manas](#)

Article published on January 11th 2012 | [Home Improvement](#)

With the cost of shifting home having tens of thousands of pounds, you will find that many are choosing to move up rather than moving on.

Converting your loft is unquestionably a job for the professionals, but if you receive it correct explore only obtain a fantastic light-filled room, an additional floor for your

home, but you could also obtain a good looking ROI when you sell, as a loft can add an additional value to the value of your house. The job takes about 3 months and also

the contractors access the roof from the outside, which means there really should not be too much interruption till these people split through to build the new steps.

Is home ideal for a Loft Conversion Twickenham?

Most homes built after 1973 are suitable for the loft conversion. A simple way to check would be to decide if you can remain upright in your loft from it's

greatest stage, as this needs to be a minimum of 2.3m. Even though you can fully stand up, a dormer windowpane extension may maximize headroom through the room.

Planning requirements often mean that this is put at the rear of the home so it doesn't change the home's appearance from the street. For this reason, roof windows are

generally utilized in front to supply light and air flow.

Understand what you want

A loft conversion is really a main work and you'll want to get architectural ideas drawn up. Make sure you know what you would like so that you can brief

your own architect. Are you currently thinking about your room? Do you want to include a Bathroom therefore are you quite happy with a shower or even do you need

sufficient space for a bathtub? Do you know the rooms for use for? Have you thought about space for storage?

At this time it is also really worth spending some time thinking about lighting and other electrical needs -- if you are planning to make use of the loft as a study you are

likely to require more electric sockets, for example.

Do not get in to hot water

Many people convert their loft to add an additional bed room and toilet to their home. The layout will largely end up being dictated through the position from the

staircase as well as plumbing related arrangements for that bathroom.

Use the professionals

Getting a professional organization to transform your attic doesn't have to be a problem. With some 13000 checked out contractors in the UK. Make sure they're

familiar with loft conversion function.

Be sure to ask any kind of Roofer Guildford the way they may entry the attic for the early stages

from the work. A great builder will erect scaffold and produce in most architectural supplies through the roof. By the time they cut the stairwell away and install the

stairs, the brand new room is going to be structurally total and able to be covered. Some companies spend less by taking everything through the home, but this could result

in a large amount of damage and stress.

Request three contractors in order to quotation for the job towards your plans. This will provide you with a much better idea as to recognize the business offers best

value for money. But remember price as well as value isn't the same thing. Browse the builder, take a look at previous work and speak with previous customers to

discover if they were pleased with the quality of their own work and exactly how by which they were carried out.
