Countertops are here to give your Kitchen an added Spunk by [Robert Vadra](#)

Article published on January 3rd 2012 | [Home Improvement](#)

Countertops are designed to give kitchens an added spunk and a style that is supreme. There are a lot of benefits that you can get by using a natural stone like quartz that is manufactured in the form of formica and corian that has outstanding features. These quartz countertops will also service your needs in a better manner as compared to the granite countertops.

The quartz surfaces have began appearing on the home remodeling jobs and its popularity is increasing by the day. Granite has been the popular choice for the interior decorators and architects best choice. The major part of the quartz countertops that is sold in today's time is manufactured from 95% of the crushed quartz and 5% of the polymer. The materials that are infused are basically scratch proof and are also maintenance free. This process allows the counters to be mainly available for designer colors and that would range from translucent whites to sandy browns or monolithic blacks.

There are a number of choices that would excite the people who would want to own a countertop in their home. You can get the open floor plans of various kitchens that spread out into the dining and the living areas and it is quite important for the designers to incorporate the choices of the colors according to the rest of the house.

You can see that the best features of the quartz countertops are not visible from the surface of the kitchen. The inside of the counter will benefit when it will crystallize. If you install quartz countertops then they are indestructible countertops that you can install. There are a number of manufacturers who offer a warranty period for the counter that is installed by a licensed home improvement contractor.

If you have marble countertops then it is quite important to keep it clean and it will eventually become dirty. So you can use a soft, clean sponge that has lukewarm water which will enable to clean the marble but make sure that the cloth is only barely damp. As when the cloth is barely damp it will not take much effort to clean the marble and you can also use a soft cloth that is clean and dry it will not take much effort to clean the surface. You can also use a soft cloth to clean and dry the marble countertops. So make sure that whichever quartz countertops or marble countertops you install it should be looking good and efficient.
