The word mosaic originates from Greek, which means "patient work, worthy of the Muses." Nonetheless, mosaic tiles have been utilized even earlier during the Sumerian civilization, when the Sumerians created mosaic panels to represent their king mounted on a chariot in the course of a battle. Egyptians also employed the same to show their royalty, and at the same time decorate walls, floors, and supporting pillars. Other ancient civilizations like the Greeks, Romans, and the Byzantines also produced various uses of mosaic tiles.

Simply put, mosaic is really a decorative art which produces images and patterns on a surface by setting tiny colored pieces of marble, glass, or other materials in a bed of cement, plaster, or adhesive. Mosaic at first was comprised of pieces of tiny colored stones called mosaic tiles, sea shells, and sometimes ivory for decoration. It was only during the Roman Empire, however, when the tile patterns recognized today became common.

Mosaics have also taken on new themes with scenes from nature and other art nouveau elements. They now adorn not only the interior of buildings, but also the facades. In addition, it has become a common craft around the world and is deemed a subject in many of the well known art schools in the US and Europe.

Employing this medium has also drawn the interest of artisans who work with numerous materials such as stone, ceramics, shells, mirror, art glass, beads, as well as some strange items like pearls and old photographs. While ancient mosaics were mainly architectural, modern mosaics, in contrast, are found in nearly any location—from park benches to guitars and even bicycles.

Among the most difficult aspects of the craft is producing a mosaic tile mesh or pattern. The process could be quite difficult on a wall, for example, since the tiles could slip down as the glue cures. The problem could be solved effortlessly by creating a style beforehand on a sheet of fiberglass mesh, then gluing the complete sheet of tile up. It would give the artist sufficient space and flexibility to make a masterpiece.

Nevertheless, you don't need to undertake such a process if you call some companies that center on the distribution of mosaic mesh. Such materials are made readily available for your immediate decoration requirements without any hassle on your part.

A vast selection of high quality mesh mosaic patterns to be utilized for decorative purposes to improve your house or office renovation projects is offered by any reputable distributor. You can also conceptualize your own mosaic designs. For more info, you may visit mosaicdesigner.com.
