Reasons for Choosing Advanced Electronic Bidet Seats by [Jonemikal](#)

Article published on February 14th 2012 | [Home Improvement](#)

Bidets, which came into creation in the 19th century in France, have become commonly used toilet equipments today in Europe, Asia, Middle East, and American countries. Over the years, the use of electronic and portable bidet seats have become much popular in the United States especially among aged and disable people who cannot move their hands freely and thus find it difficult reaching their backsides while trying to clean and wash their inner butts, hips, genitals etc. Advanced warm and cold water bidet seats are said to be much beneficial, if you are suffering from some ailments like constipation, diarrhea, piles, hemorrhoids and obesity. These bidets offer great help for pregnant ladies who frequently go to toilet and find unable to reach their behind and clean themselves due to their overweight and heavily blown up stomach.

Patients suffering from hemorrhoids and urinary tract infection often complain of rashes and sores around their genitalia. In this situation, if they use toilet paper, the problem will be further aggravated. Using electronic bidet coming with hot and cold water facility will help such individuals to prevent infections and get relief from rashes, sores and inflammation in the affected areas. So, there are many benefits of utilizing warm and cold water bidet seats. They prove convenient and comfortable to use for everyone including children, aged, disabled and pregnant ladies. To know more about bidets, just browse through internet and extract details.

A quality electronic bidet uses both hot and cold water and thus makes it possible for you to maintain proper hygiene and cleanliness both in winter and summer season. The size and style must match up with toilet and water lines. Ensure that the model you choose takes less space in your bathroom and have all the modern features such as heating seat, separate cold and warm gentle water supply, built-in deodorizer, temperature system, air dryer etc. There are different types of bidets available in the current market. You will find them in wide range of shapes, sizes, colors and designs. However, you need to choose the one that best match with décor and furniture of your house and toilet. It should be easy to install and easy to use for you.

When it comes to buying electronic bidet seats, options are just plenty. Past few years have seen heave increase in bidet seat providers across the globe. Companies are offering a huge collection of bidets in varied sizes, styles, designs and prices. This might lead to confusion while selecting a toilet seat for your bathroom. Visit some online sites which let you compare the prices, benefits and features of toilet equipments. Make sure that the bidet you buy should have features like adjustable water temperature, auto power saving, closing and opening lids, double nozzle etc.
