Redesign your interior with new energy saving bulbs by [Nick Kandola](#)

Article published on August 13th 2012 | [Home Improvement](#)

In today's world we call those an old people who are using old technology in their lifestyle. If we talk about our day to day home appliances then there are several people who are still using old incandescent bulbs. Incandescent bulbs consume a lot of electricity to remain functional and emit brightness. They convert a major part of the consumed electricity into heat. These bulbs were the part of our past life. But now energy saving light bulbs are available in the market. The energy saving light bulbs, due to their powerful design and higher-quality of raw materials being used to produce them, last almost 10 years of normal use. The Mem bulbs available in the market are a part of energy saving bulbs. These bulbs emit much less heat compared to other bulbs available in the market.

The Mem bulbs consume a far less electricity which helps in dropping the electricity bill. These bulbs have for the last few years been termed as the best means to reduce electricity usage. These bulbs are now made by many companies, which reduce its cost immensely. The fluorescent light bulbs are now available in different shades, designs and sizes as per the need of the user. For that they are being used in decorations, interior designs, offices and many other places. Even the right type of lighting can change the look of your home. Proper lighting can make all the difference in how your home will look and feel, it can noticeably change the appearance of your home.

One of the most cost-effective ways to save energy and money depending on your lighting. The memlite bc3 is the real energy saving light bulb which is being used worldwide in homes and offices. It has inbuilt ballast and driver so can be used as a direct replacement for the conventional incandescent light bulbs and provides a saving of around 80% in electricity costs when compared to the conventional light bulb. If the light of your home is not suitable then it can cause several other problems to your health also. Sore eyes and headaches are a known cause of bad lighting, so choosing the right lighting for your home is very important.

However we are talking about the energy saving bulbs available in the market, then we have several options available for our home or offices that can save much electricity. The energy saving gu10 type of bulbs is also famous for conserving less energy and giving more light than any other type of bulbs. You can find the large variety of these bulbs online.
