The Benefits of Quartz Countertops by [Robert Vadra](#)

Article published on August 6th 2012 | [Home Improvement](#)

Available in a wide variety of colours, textures and styles, quartz countertops are quickly becoming the number one choice in the world of kitchen and bathroom renovations. It's no wonder why, either—they offer tons of advantages over other countertop materials.

Like many people, you may be having difficulties choosing between natural stone countertops, such as granite, and manmade countertops, such as laminate. With quartz countertops, you don't have to choose! Created with a combination of natural quartz and polymer resins, quartz combined the best of both worlds. Here are just a few of the benefits of quartz countertops:

Quartz is the most durable countertop material available: With a scratch resistant surface that ranks No. 7 on the Mohs hardness scale (just three spots away from diamond!), so you won't have to worry about unsightly scratches or chips! Even heat can't harm quartz—you can place your hot pots, pans and baking sheets directly on your countertop without leaving any burn marks.

Quartz countertops are nearly stain-proof: Coffee, olive oil and red wine are no match for a quartz countertop! A nonporous surface, quartz countertops don't even need to be sealed or treated, unlike granite countertops, in order to prevent stains.

Quartz countertops are virtually maintenance-free: When it comes to counterops, you won't find another material so minimally demanding maintenance-wise. A little bit of warm, soapy water is all you need in order to keep your quartz countertops in tip-top condition.

Quartz countertops are bacteria resistant: Perhaps one of the most alluring properties of quartz, the nonporous nature of quartz makes it difficult for bacteria, mold and mildew to grow and develop. This makes quartz the ideal material for kitchens and bathrooms.

Quartz countertops add value to your home: Think of quartz countertops as an investment—when it comes time to sell your home, they will most definitely pay for themselves!

Quartz countertops can suit any space: Quartz countertops are available in a variety of colours, textures and grains. There is a quartz countertop for you, whether you want a sleek white countertop, or an elaborate and grainy one.

For more information on quartz countertops, visit Custom Granite and Marble in Stoney Creek, the headquarters for bathroom and kitchen countertops in Ontario.
