Welcome in the LIVE paint colors by [Dany](#)

Article published on February 13th 2012 | [Home Improvement](#)

Commercial Painting

Commercial painting is the concept which is a trust work. It is done at commercial places like office, restaurants etc. It has two parts interior and exterior, exterior needs attractive colors while interior needs the colors which reflect the business nature and maintain the atmosphere for business in the room. We have experience in the field of commercial painting; we understand the needs of various people in commercial painting. We have skilled and experienced commercial painters who not only do their work but also suggest new ways for your commercial place. Our painters paint in careful and in professional manner. We deliver you the detailed quality service.

Industrial Painting

Industrial painting defines the protectiveness of walls. It has a wide variety of methods to use paints on surface. Most commonly it is used corrosion control in the structures of steel like underground pipelines. Industrial coating is of different types like zinc, inorganic etc. In industrial painting, before coating lots of preparation is needed. Coating with the spray is very common, and the coating with the rollers is only option. There are many options for this. The industrial painters are very flexible as they are offered wide range of different process.
