With passion and dedication, you can build your own successful small Business Start-up by [Tommy Jackson](#)

Article published on July 4th 2012 | [Insurance](#)

When you're starting with small business start-up, they'll always seem like something challenging and complex to begin with. However, if you plan well then these startups turn out to be simple enough.

First step you have to take is come with an idea for the start-up. The key point is the idea doesn't necessary be a world changing one or unique or exciting and in fact you can pick an existing as well. However, the catch is that you've to pick an idea you're going to stick with till the end and you're enthusiastic about. If you're passionate about the idea then the road will be a bit easier for you. Dedication towards the task is what makes a business start-up work. If you have the dedication and passion, then you can easily overcome the minor business troubles in the start.

Next step is to make a blueprint of your business idea. These small business ideas are generally very detailed and therefore, even if you're going for a simple business, you need to put it down on paper. Because in the end you'll need a map of what you need to focus on. However, this process should take place according to the company's needs, if a business plan suits your startup then write a business plan. Moreover, you can also create a mindmap. You'll find various free as well as paid programs to help you out with these processes. Besides, you can also note down your goals and specially the smart goals. Later on you can use these goals to proceed further towards your target and motivate yourself regularly.

Getting a federal Tax ID should be one of the most important things when you begin with a business start-up. You can then use this ID to form your business entity with your state's secretary. You can then also use this ID to open a savings as well as checking accounts.

Moreover, you'll have to get a business form which matches your business to get the advantages of tax treatments. For example, there are options such as C-Cooperation, S-Corporation, LLC, Partnerships, Sole Proprietorship. In case you don't understand it, you can also contact a lawyer to help you out.

Next step should be opening a checking and savings account in a bank. Since your business start-up will be receiving money in the form of paying bills, you'll need a savings and checking account to run your business. With banks helpful towards new businesses, it'll be easy for you to find a bank giving you a free savings and checking account for your company. Look for the local banks in your area, and the local credit unions have better options for small businesses.

The final step of your business start-up is to give it a go. For this you'll have to find customers for your company. This can actually be a scary as well as an interesting part of running a start-up. There are various options that you can use to find customers, like social media, craigslist, ebay, etsy etc. Or maybe you can create coupons as well as flyers to market your start-up, give away pamphlets in your local area. Moreover, you can also use pain advertising on TV, newspaper or the radio ads to lure consumers towards your business.

Therefore, even though these processes might seem a bit difficult, but with proper planning and dedication, you can easily achieve your targets and thus become the owner of a successful business start-up.
