Social networking sites have become a virtual meeting place for many. by [Samantha Kirk](#)

Article published on February 28th 2012 | [Internet](#)

Internet has become a huge source for people. Now, we can do anything on the net from selling our bikes to having a business. A lot of things have become a possibility with the advent of internet. So what is internet? It is the biggest global system that connected by various networks around the world and the common aspect for these networks are the standard Internet Protocol Suite which serves millions and millions of people worldwide. This network consist numerous number of private, public, government, academic, commercial and business networks that are inter-connected by a series of broad bands which are connected by optical networks, wireless and electronic connections. Internet is the only source that carries extensive source of information the websites containing these information are inter-linked by World Wide Web, famous acronym used is WWW.

So what are the new avenues available to people? Now the latest trends on the internet are the social networking websites. This has become very popular with the users at it helps connect with friends irrespective of the time and geographical and time differences. Let's not forget that it has become one of the cheapest forms of communication. Instead of shelling out money for calls to each friend or loved one, now people can simply log on to one of their social networking accounts and chat with friends simultaneously which costs very less compared to making phone calls. This is one of the main reasons for social networking websites' popularity among youngsters.

Websites like orkut and facebook not only helps in connecting with friends but also find new friend or groups with common interest. For example, if a person loves animals, then he can join the animal lovers group. This not only helps him in interacting with others who have the same interest but also helps him in gaining enlightenment and knowledge on his interests. There are not only groups for serious issues and interests; there are also groups for shopaholics, gamers, music lovers, movie fanatics, technology geeks, etc. these groups bring together people and let them discuss interesting topics that fascinates them. People also get to know the latest happening or news through their community. There may also be experts in these groups who help in broadening their knowledge.

Pictures and notes can also be shared on these websites. A birthday, a graduation, parties, weddings and any other event can be shared by uploading pictures and sharing with friends and loved ones. This enables people around them to keep a track on what is happening in their lives. These websites have sure made the world small by enabling people to stay connected irrespective of place or location all they need is a computer and internet connection.

It has become a great platform to exhibit talents. People can now share any talent they have through these websites. A wild life photographer, amateur oil artists, an ardent cook, a poem writer, a graphic designer, sport enthusiast and anyone who wishes to show off their talents or hobbies can now let the world around them know that they are good at few things that the other don't know about.

Now, these social networking websites have become a kind of virtual meeting places for people, to hang out with friends and loved ones with the help of the internet! For those who feel that internet is an additional expense along with their phone and television connection, it is not a problem any longer. Now there are packaged deals like the cox deals that have all these connections in one package which makes it very cost effective for many.
