A good link directory service sorts for the specific necessities of the link exchange partners and help with the diverse category of link directories. The process is different from the mass emailing service as link exchange requires selection of partners with proper care so that the benefits of such exchange can be maximized.

Before you submit a link to such a directory, you should be careful to judge some vital factors such as relevance of theme, levels of traffic, popularity rank, particular requirements of trade, etc. You just cannot select a website randomly and swap your link with it.
