The Prospects of Early Pension Schemes by [Julia Roger](#)

Article published on July 19th 2012 | [Investing](#)

Every individual looks for a secured future and old age. The different pension plans offered by companies help in guaranteeing you with assured monthly returns and even let you enjoy your life in your own way. But at times you find yourself in need of money and regardless of your efforts you need to opt for Early pension option. There are many firms who would try to lure you by their marketing techniques and make you rely on them for encashing your pension funds. They would even offer to release, unlock as well as transfer tax-free cash from their funds before retirement. But there are high chances of you getting entrapped as they would part you from enjoying the long run savings throughout your lifetime.

You might be provided with various lucrative offers which might sound tempting but when you would analyze the real situation you would get to know that all these are mere scams which are being publicized by illegitimate companies whose main motive is to get your funds transferred into an overseas scheme which is absolutely fake and is meant only to deceive you. They would promise you tax savings but without any guarantee with regards to your Early pension money. Pension release should always be considered as the last resort and you should only approach firms and companies who are trustworthy and have been in the business since quiet some time. Unlocking pension means that you would be putting your retirement plans at risk as you would be receiving much less when you retire. Prevent yourself from being a prey to such scams to keep enjoying your old age benefits.

Pension unlocking is subject to tax charges but would leave you in distress during your old age. You would not only be leftover with lesser cash but would also need to pay high fees to the firms who are arranging immediate cash facility. These fees would get deducted from your funds which mean you would be receiving lesser amount. Don't get tempted by the instant gains but think about a secured future. Lucrative offers are not meant for client's benefits alone but even have hidden intentions of the company. Be cautious and prevent yourself from pension release scams.
