Sapphire stones are beautiful pieces of naturally occurring blue that adds both style and dignity to the wearer. The dark, mystical shade of blue of a sapphire stone adds to the enigma of it, thus making the wearer feel beautiful from inside. Sapphire rings in both the metals of gold and silver look gracious, regardless of the depth of beauty of the wearer. Suiting all sorts of complexion, even wearers with black eye colors can look exceptionally beautiful in sapphire jewels. Ceylon sapphire rings are particularly favored for their hardness that adds to their durability.

The interesting part of a sapphire stone is that in spite of its multiple facets, its reflect-ability is limited to the concentration of blue that it exhibits. In fact, the cuts and angles help to brandish the evenness and depth of the color. An excellent choice for jewelry, the stone is primarily mined in Sri Lanka. Despite its dark shade, sapphire rings can accommodate different stones apart from sapphire to mix and match the style. While, you can order keepsake rings with the blue sapphires, the Ceylon sapphire rings will serve you really long even though usage is rough and incessant.

Impressive as they look, you can order the stone in white gold, yellow gold, rose gold and sterling silver and platinum, based upon your choice of the metal. Ceylon sapphire rings make brilliant choice for engagements, as these sturdy stones will last a lifetime of ravages, thus upholding the relationship till the end. Ideal for those born in June, the stone is good for both Geminies and Cancereans. To make the simple sapphire rings a little more chic, you can add trellis design to them. Small white diamonds will look absolutely stunning beside the crowning jewel. You can keep it unbeat by placing an emerald-shaped sapphire in the center flanked by two smaller square diamonds on both sides. This design will look fabulous on a simple platinum ring band with bevelled edges.

Another unique choice of sapphire rings is the one that dazzles with small diamonds encrusted on the band. This striking choice of ring will be perfect for the occasion of engagement. The blue sapphire will hold the center stage symbolizing deep love shared by the two, while the diamonds on the sides will represent a blissful journey. You can make the ring even more appealing by fitting two large diamonds beside the large, twinkling sapphire. Use solid gold or silver for the band as desired. However, buyers must know that Ceylon sapphire rings are not very leniently priced. In fact, prospective buyers should be ready for a hefty investment with such an ornate ring.

However, you can make use of some discounts by buying the jewels online. Not only will you have access to substantial price reductions, but also to a wide range of bespoke designs.
