Deploy Effective techniques with Six Sigma Green Belt Certification by [Nitesh Ranjan Bharti](#)

Article published on December 7th 2011 | [Management](#)

Six Sigma can be defined as a business procedure focusing on improving the quality of processes by identifying defects and removing them. Each project in an organization is carried out with utmost efficiency but sometimes extra effort is needed to put into it in order to achieve the desired results. Six Sigma Certification includes Black Belt certification, Green Belt certification and Yellow Belt certification. The objectives of the techniques in Six Sigma Delhi, Bangalore & Mumbai are to help deploy techniques to lead small scale improvement projects within an organization. Its methodologies are based on optimizing company profits by reducing variations in the processes thereby reducing waste to increase the efficiency in operations. AstroWix offers Green Belt Certification which encompasses all aspects of running a Six Sigma Green Belt business; including management, service delivery, design, production, and customer satisfaction. The training curriculum at AstroWix rivals that of American Society for Quality (ASQ) standard of certification for Green Belts. Six Sigma Green belt training Delhi, Bangalore & Mumbai equips professionals with problem solving skills with special emphasis on DMAIC (Define, Measure, Analyze, Improve and Control) model.

Six Sigma Green Belt certified people are extremely effective in bringing good results to the company and growing professionally. These are considered to be the main implementers in an organization. Employing green Belts can help the company achieve cost efficiency cost efficiency in hiring and training them. After getting Six Sigma Green Belt certification a professional can aim at acquiring Six Sigma Black Belt certification. AstroWix is a leading consulting and certification firm in India offering Six Sigma certification programs. We at AstroWix endorse business excellence knowledge across industries in pursuit of competitive advantage for our clients.

Organizations nowadays are introducing new techniques and applying new approaches to their day routine operations with the objective of improving performance at individual levels in an organization. Due to this pressure on improving performance at individual levels in an organization Six Sigma Green Belt certification Delhi, Bangalore & Mumbai is being introduced in order to achieve excellence in operations. Six Sigma is a management process structured to collect information and analyze data to reduce the defects in products and services. The reason behind emergence of Six Sigma is that it helps you identify the issues responsible for project failures or defects and devises a way to eliminate them. The biggest advantage of implementing Six Sigma Certification is that it can be applied in any organization whether large or small. Also it can be applied to any department in an organization as the skills taught in this certification can be implemented at any level. Its methodologies help in removing manufacturing defects and improving production processes. Six Sigma is considered to be a quality initiative and is applied to business operations to bring effectiveness in operation making it easier for organization to achieve the set targets.
