Traffic Management Plans for Safety and Efficiency by [Julia Roger](#)

Article published on July 14th 2012 | [Management](#)

Very high number numbers of deaths happen on the road and thousands of people die in road accidents all the time and no matter what measures are taken, some or the other mishap takes place putting strain on the authorities and questioning their management and planning. This is why traffic management is a very important duty that has to be fulfilled by councils and authorities to maintain safety and increase the efficiency of smooth and accident free traffic.traffic managementincludes controlling and supervising the road networks to achieve the desired outcomes mentioned above.

If the roads and traffic are not properly managed, their maintenance cost increases putting a strain on the economy and increasing risks for commuters who use that road. Bad management also leads to delays and jams which sometimes take a long time to clear up causing problems, especially in the time of emergencies. Because of all these reasons,traffic management plansare devised. These management plans aim to solve all the problems that a person could face because of bad roads and inefficient traffic systems. They aim at keeping the road users safe, introducing more efficient public transport so that a sustainable and more environment friendly manner of commuting is taken up by the people. It also includes enforcing the traffic laws and keeps the traffic moving my maintaining traffic signals and lanes.

While devising traffic management plans, the assessment of risk and other problems are done. Another important factor considered while making this plan are the physiographic details like the terrain, the weather of the place etc to make a plan that suits the locals. The plan also takes into consideration the safety of the employees and emergency plans are also drawn out for the time of an emergency. All these facts and duties make it a very important task for any road council or authority to work and implement such a plan.
