Undoubtedly, a car accessory adds personality to a car. An accessory can transpose a dull appearance to a sizzling look; in the parlance of the dating world, an accessory can transform a car from a wallflower to the life of the party. If you are in the market for a car accessory and specifically a Honda Accord moon roof visor, then this article is tailored just for you-read on. The Honda Accord moon roof visor has a retail price of some \$ 125; when purchased from selected Honda dealerships this accessory will be offered at a discount price of \$ 90.

The most logical question that some one who wants to pimp(sic), their Honda would ask is this: Of all the accessories that I can possibly get for my Honda, why go for a Honda Accord moon roof visor? Two reasons suffice for the above question. Foremost is the fact that it allows for the regulated circulation of air within the cabin of the car; natural air, not the filtered stuff from air conditioning systems- the second advantage is that the Honda Accord moon roof visor is designed in such a fashion that it reduces both wind noise and turbulence in the cabin and thus making for a smooth driving experience. Lastly is the fact that it looks good. These are the advantages of purchasing a Honda Accord moon roof visor.

The Honda Accord moon roof visor can be installed at the dealership where it is purchased or one can install this accessory by themselves. The individual who elects to take the latter route is essentially equipped with an instruction manual that guides them on the steps that they need to follow. The Honda Accord moon roof visor that the individual will be working on comes packaged as follows:

• Foremost it's construction component is Acrylic that comes in dark smoke color, UV resistant material

• Secondly, the dimensions of the visor are as follows: 38.5 x 97.9 cm – a word of caution though, different countries might have different roof sizes and consequently one needs to understand the specs of the country that they are in.

• Thirdly, the Honda Accord moon roof visor is essentially a direct tape on wind deflector. This means that there is no cutting, and nor drilling exercises that come with the fixing of your wind deflector. The UPVC material that is touted to outlast other PVC material by up to 5 times is sold to you with the inclusion of a 3M brand adhesive tape. These facts are must understand for anyone in the market for a Honda Accord moon roof visor.

Apart from Honda dealerships, one can obtain a Honda Accord moon roof visor from car accessory dealers who come in all shapes and colors. The Honda Accord moon roof visor is essentially designed for Honda Accord models that were manufactured between the years 2003-2005. For more information on how to process your order, the delivery time that you should expect, and pricing differentials, get in touch with your nearest Honda dealer.
