BlackBerry Bold 9900 a Professional Handset by [Andy Thomson](#)

Article published on July 21st 2012 | [Mobile Phones](#)

The BlackBerry Bold 9900 is the first choice of the professionals and possesses a brushed metal band around the outer boundary moreover and is a less plastic handset. It has piano black finish at the summit of the smart phone. The smart phone is thinner if comparing with the earlier model and is 10.5mm thick moreover is bulky and solid. The keyboard of the smart phone is separated by the display screen through a row of buttons with a visual pointing device nestled in the center.

The screen is touch sensitive, the optical joystick is somewhat outmoded and is convenient to those who got used to it on further BlackBerry devices. On the right-hand side of the gadget there is a button of a dedicated camera and a 3.5mm headphone jack is on the left-hand border. The BlackBerry Bold 9900 has shown a great improvement in the screen if comparing with the Bold 9780 moreover the older gadget had a resolution of 480x360 pixels and the present gadget had 640x480 pixels. The capacitive technology is used in touch screen and is very approachable for various multi touch gestures such as from pinch to zoom while web browsing.

The display is of 2.8 inches which imply that the pixels are collectively and firmly jam packed in addition to this providing a pixel density of 287 dpi; this in turn resulted in a sharp text and icons. Its elevated distinguish and energetic colors in the videos and images look excellent moreover its remarkable resolution helps the screen to stand out. It possesses the best screens amongst the existing handsets and in addition to this over the years the most important strengths of BlackBerry handsets have been their keyboards.

Moreover the keyboard of the present and earlier BlackBerry handsets remains the same. Its angular keys help in comfortable typing whether you're holding the phone with one or two hands. BlackBerry added some dedicated keys like punctuation marks, full stops and the '@' symbol and its layout is very good. In the smart phone the long press on letter opens the doors for the capital letter which in turn encourages good punctuation in emails and text messages which is preferred by all the users.
