For the First BB10 Phone Blackberry Ditches its Physical Keyboard by [Nick Willis](#)

Article published on July 4th 2012 | [Mobile Phones](#)

Like the other BlackBerry handsets this time BlackBerry 10 would go to ditch the signature keyboard for the upcoming generation of handsets. When the software of latest BlackBerry would arrive then you would find it on a touch screen gadget. This is a highly developed shift but it could push away the BlackBerry's most excellent consumers. In the list of BlackBerry handsets BlackBerry 10 is the next generation of software moreover along with the characteristics that would pull the esteemed mailers keen on the smart phone revolution.

The BlackBerry handsets would be admired by business class people for their security and especially for the teenagers for limitless BlackBerry Messenger service. After the arrival of Android handsets and the iPhone the BlackBerry phones have been looked gradually more outdated. In BlackBerry 10 there is a latest software keyboard which would teach you how to type. In addition to this when typing the letter if ever you likely to hit the summit left hand corner then in the future it would be recorded as an ideal keystroke.

The other feature of BlackBerry 10 keyboard is that it automatically learns the words that use frequently so the gadget can make an educated forecast for what word you would go to type next. According to the news Research in Motion the creators of BlackBerry would launch the new-fangled software to their handsets along with the physical keyboards at some phase however RIM is not speaking out when. Basically the main feature of RIM is its keyboard. The BlackBerry is the originator to the other latest smart phone moreover the signature keyboard is regularly necessary for typing emails, texts and BlackBerry Messenger chats.

But the arrival of iPhone and Android gadgets has discarded physical keyboards for touch screens and implicit onscreen buttons. BlackBerry admirers grip to their clicky keys but now this is a story of past. In addition to this a touch screen can be a keyboard and can display videos, games and display apps but all these work cannot be performed on a keyboard. So now this is the time to change the thinking of the BlackBerry admirers by leaving the keyboard feature. There are plenty of features riding on the back of BlackBerry 10 moreover it is one year delayed by RIM.
