Article published on December 26th 2011 | [Mobile Phones](#)

Blackberry Bold touch is coming up with some new inventions and is the latest handset. With this smart handset you may browse over the internet very easily and moreover makes the communication very straightforward and trouble-free. The advanced Blackberry is the improved version of operating system and it seems as if the modern computer has been stuck into the mobile phone. This enhanced version in the operating system is known as Blackberry OS7. Moreover the enhanced 1.2 GHz processor along with 786MB of RAM makes this trendy handset very speedy and trustworthy.

Installing a computer in the mobile phone is really a good idea and wonderful experience. On the other hand the processor assures an individual that the internal system is very trustworthy especially for those who perform all their tasks through mobile phones. The processor also assures that the software would run very smoothly and without any obstacle while downloading any of the relevant data. The most important basic key features of the Blackberry handsets are its reliability or trustworthy which creates a superior goodwill in the market.

The new has really work very hard in improving surfing over the internet by supplying towering fidelity which helps in maximizing the loading speed of the web sites or pages. It also has a voice enabled searches which is fresh technology in this gadget. This is the nature of the blackberry that it always adds something new to its mobile phones. Under this facility the user may ask his mobile phone to do any kind of search by using voice activated feature. This new Blackberry 9900 provides powerful internet connectivity due to the accessibility of the dual band Wi-Fi.

The operating system OS7 helps in choosing separate and corporate files. So with the help of this all your personal emails, twitter, face book and other social sites are kept aloof from all your work files. This smart phone is very flexible and it is reliable for both sections that are personal as well as corporate. It also consists of NFC technology which helps in performing mobile payments and wireless data transactions. With all such features makes the gadget a new invention.
