The DSLR KIT-11 was specially designed for DSLR users, who needed a device that had a minimum level of complexity and that was also priced within their budget range. This device is very professional and lightweight, and it will allow you to engage in shooting for hours without you feeling tired.

The features of the DSLR KIT-11-Shoulder Mount include:

- â€¢ There is a counter weight that allows you to distribute the weight of the device evenly, so that you will be able to shoot for long hours without getting tired.
- â€¢ There is a Straight Bracket (15mm), which enables you to utilize the camera off center, in order to take the camera to eye level so that you can use the eye piece.
- â€¢ A tripod mounting plate is included in this kit, and the Whole Rig can be seated on top of it.
- â€¢ While shooting, you do not have to worry about your hands getting tired as the telescopic handles are equipped with rubber gripping.
- â€¢ There is a shoulder pad that helps to take away the stress from your shoulders while shooting.
- â€¢ The included height riser makes it easy for you to adjust the camera to the height that you want.
- â€¢ The camera mounting plate is equipped with horizontal adjustment.
- â€¢ The various parts on the shoulder mount can be adjusted along the 15mm rods.

Features of the Follow Focus include:

- â€¢ Ability to fit a majority of lenses with the correct gear drive.
- â€¢ Enables focused lenses to be used and geared with the 0.8 module, which is the industry standard.
- â€¢ Can be mounted on the 15mm rod support (there is a center-to-center difference of 60mm).
- â€¢ Locking system that is adjustable.
- â€¢ A slide mounting mechanism that can fit practically any lens diameter and it is also adjustable.
- â€¢ Has a design that is completely gear-driven, which allows for accurate and slip-free movement.

Features of the Matte Box include:

- â€¢ Equipped with 2 filter holders (4 x 4 inches), which is ideal for a combination of square filters and polarizer.
- â€¢ A rotating filter holder that allows you to install or eject the square filter, without having to disturb the flash or microphone settings.

â€¢ The front adjuster has a quick lock mechanism, is made from metal, and attaches the device to the 15mm rods.

â€¢ Equipped with foam donut rings that will protect your lens during the grinds and bumps of recording exciting footage.

â€¢ There are five donuts that are included with inner diameters of 54mm, 65mm, 75mm, 78mm and 81mm. The outer diameter measures 95mm.
