Article published on February 4th 2012 | [Shopping](#)

Racing model trains and slot cars and has become a favourite hobby of many people in Australia. Enthusiasts for this hobby are increasing and many slot car racing clubs are established in every city. Most of these clubs are established to have described that their primary objective is to have fun. Slot car racing can be appreciated by all age groups.

Let us know about slot cars in more detail. They are simple devices basically mini models of racing cars. They are supplied power with the help of metal strips. These strips are situated right next to track slot, picked up by the contacts beside guide flag. This guide flag is basically a blade that swivels and is situated at the front of the car. It has a voltage which is varied by resistor of hand controller hold by the car's driver. It then forms the basic circuit. You can also find other electronic devices, which are available in the market.

These slot cars are just mini versions of their full size counterparts. These cars are comprised of a body made of a solid molded piece of plastic, which easily fits on top of the chassis.

Some of them are built from scratch and are stunningly hand-crafted. While some of them are customized to their best performance edge. Swivelling flag is very important in order to keep the car from flying off the way, when taking curves. It gives an exciting appeal to participants.

Racing of different moods came out with construct of model trains. One can feel the intense thrill with the outcome of the piece with an artistic way of its designing. No matter if you are not talented as a model train enthusiast, still you can take some time out to learn and embrace the passion of your hobby. By learning its skills, you can come up with an understanding all the technical terms used with model trains.

The gauge of the model train describes the distance between rails of the track. To be more specific, it is the size of the track wherein the trains run. It also identifies the size of the train.
