Use Organic Cotton Clothing - Aid in Reducing Pollution Levels by [Dexter Morgan](#)

Article published on December 22nd 2011 | [Shopping](#)

Organic clothing is the need of the day. It is made from an eco friendly matter that is raised or grown without the support of chemicals such as herbicides and pesticides. Organic clothes has not been subjected to the chemicals other material has been exposed to, made from natural fibers that are acquired from an animal, mineral or plant. A small amount of the options of organic cotton clothing is bamboo, hemp, wool, soybean and cotton. The fabric for clothing should not be genetically modified or spoiled with chemicals.

Organic wool has not been bleached or dyed with the chemical dyes and it has not been subjected to noxious flea prevention treatment. The natural colors of this fabric are gray, black and white. Cotton that is used in organic clothing should not be genetically contaminated or customized with pesticides. Since bamboo grows in large quantity, its availability is not a problem and its inherent growth affinity allows it to reproduce with easiness. Bamboo fabric has a big advantage of being reusable in nature. Soybean material is replenished able and that is a huge benefit compared to other materials. It is also known as vegetable cashmere. These organic cotton clothing is biodegradable in nature. Hemp remains free of pesticides, as its very nature is repelling pests and insects. It is considered the one of the most advantageous crops because of its potential to stimulate the soil. This fabric is ecologically good and long lasting in nature. It is multiple times tougher than cotton.

Previously, organic clothing was never considered fashionable clothing as compared to the standard clothing, but the times have changed a lot and so has the technology, thereby making organic cotton clothing a trendy choice. Everyone is becoming more aware about the environmental dangers and that is the reason why many stores have changed over to organic clothing. Recycling is fast becoming a mode of life. Getting free of synthetic possessions is the new in thing all over the world. These cotton clothing has nothing chemical or synthetic in them. Synthetic clothing can sometimes trigger of rashes and allergies, the dyes are all natural dyes, thereby making it a good choice. As compared to regular clothing, organic cotton clothing also has longer lasting. Clothes that have this characteristic will continue for a longer period making the outfit wearable, and being hardwearing will not have to be substituted. You will not find offensive odor either. In recent times, more people are getting to learn about prevention of pollution and therefore it is a viable choice for the environment conscious people.

We could help lessen the pollution largely if we create a step and prefer organic clothing as a substitute of the chemically produced choice we go in for, and we can make this world lesser perilous to live in. Such clothing is a good choice to opt. By cutting down habit of factories that are lofty in CO2 emissions and append to the air pollution, we will be serving our environment. Modern person who opts to assist the ecosystem prefers organic cotton clothing thereby doing his part to protect the environment.
