A stand alone application for remote access of digital content by [Anand Kumar](#)

Article published on March 20th 2012 | [Software](#)

Here is a solution that enables you to enjoy your favorite music, videos and personal digital data (photos) present in your personal LeapDrive account to be accessed easily for a view on the television sets. With LeapDrive supporting innovative methods to access data, the LeapDrive TV enhances the data interaction and TV viewing more exciting and customized. This solution is developed on the Yahoo IP TV technology domain.

Accessing the multimedia data and running the same on Television sets is easy and quick with LeapDrive TV as this an integrated online storage solution for data protection, media content management and is capable of remote access to data. A Yahoo connected TV will be able to display contents such as media files (video, audio and images) in the user's account. Browsing feature on the TV is also possible with this solution. Hence, watching your favorite videos, photos and your music collection is easy and available according to your fancies!

LeapDrive TV widget offers significant opportunities to make the TV viewing experience more interactive and personalized. The TV is no more an "idiot box" as this widget gives the user an option to view/play all the online content (Music, Photos, and Videos) on his TV. The user can create personalized albums or official presentations and view them anywhere on the TV.

With the TV being a convenient device for viewing multimedia content, this widget has it all to make use of the TV's robustness in displaying the data. The widget is capable of easily accessing top 50 media files that is uploaded on server. With an ability to handle a huge number of media files TV based digital content is bound gain popularity very soon.

With My Media, all the contents which the user has previously uploaded in the LightBox will be displayed in four different categories. That is all the data in the My Media, Photos, Audio and Video. It also shows page count at bottom and displays 5 media files at every page.

Another salient feature of LeapDrive TV widget is it starts the multimedia slide show by continuously playing the entire media one after the other that is present in server. To enhance the user experience, the LeapDrive TV application displays 50 recently uploaded photos (be it personal or entertainment) circular slide show mode and list of 20 recently uploaded songs starts playing in background. At the end, the Search My Media option allows user to search any uploaded media file on entering at least three characters of the file name.
