Different Solutions for mts Incompatibility in some video players by [Justine Biber](#)

During summer vacation I planned to visit a hill station with my family. It was a very nice tour and we enjoyed a lot. As I have a passion of using my camcorder to create pictures and videos so I used it during our tour and recorded plenty of videos. I tried to play these videos on my Mac but can't do that because of the incompatible video format. I did not have much idea about video formats at that time so I can't get much idea about the problem and also had no idea how to solve it.

Many people face the similar problem when they try to play mts files to their Mac, ipod or other similar media players and portable devices. Most of these portable devices do not support mts format and thus you need to find out some way to convert these files to compatible video formats only then you will be bale to play them on Mac or ipod.

So I decided to use the internet to find out the solution. I posted my problem in few forums and people replied with many different solutions. Most of the people recommended using mts converter for Mac to convert files from mts to other popular video formats. This option looks best to me and I decided to try it out.

I used the Google search to find out â€˜mts converter for Macâ€™ and results shown were having plenty o different software. I was looking for specific software for Mac so I preferred the one which was specially developed for Mac.

Mts converter Mac is an amazing tool which all of you should have these days. As with the increased use of camcorders at birthdays and other occasions almost all of us cam across situation where we need to play these videos on Mac so we should already need to have required software installed to avoid any inconvenience at the time of usage.

Most of the

mts converters for Mac provide conversion facilities to more than popular video formats. These programs are very easy to use and any one can easy convert to any of his required format in just few minutes. You just need to addselect file which you want to convert and after adding you can made necessary changes if you want. After making changes you need to select the format in which you want to convert. After previewing, you click on start conversion or convert button to start converting your selected file to your specified format.

Some of the converters also allow you to make changes and add extra features and effects to videos before converting to your desired format. It can be a very handy option as you can make your videos more interesting and attracting. You need to make sure to preview the changes to avoid any inconvenience later on. By making best use of all the available options you can convert unlimited mts videos to any of the popular Mac compatible video formats.
