Enjoy the popular Racing and Ninja games on your PC by [Maria Gini](#)

Article published on February 24th 2012 | [Software](#)

Mobile devices and personal computers, apart being great tools for communication and managing all types of work, are also the tools of great recreation. They have made these devices to be used as full fledged video consoles. In response to this additional function of these devices many developers have come up with highly entertaining games for these devices. Automobile Racing games have been developed in mind boggling varieties with these games offering you simulation of real life experience. Drag racing on PC game is yet other types of racing games made for mobile devices. Drag racing refers to a special type of racing which is run for on a short track of about 400 to 800 meter only. Drag racing game was developed ion the one of the most popular mobile device operating system Android. The great advantage of this platform was one could download thousands of apps from Android Market place. The same game, Drag racing on PC can be now enjoyed on your PC even without having an Android based mobile device or a tablet.

This is made possible by the innovative program developed by Bluestacks, called App Player. This program is designed to enable you to run many apps on your PC. What is the importance of this new development? You must realize that most of our PCs are based on Microsoft Windows and so you can not run apps designed for Android operating system. So the App Player is a program that facilitates this interface of working android apps on Windows based PC. You can run many useful apps as well as android based games. Fruit ninja for pc is yet another game that is designed as an Android device game but if you have installed BlueStacks App Player, you can run Fruit ninja for pc as well as other games on your PC. The App Player allows you to enjoy these games without dual booting even if you are using two operating systems. This is achieved by creating a Virtualization Layer which acts as an interfacing layer between Windows Operating system and Android apps you wish to run on your PC.
