How to Get a Perfect PSD to WordPress Conversion Provider by [Andrew Ross](#)

Article published on February 14th 2012 | [Software](#)

WordPress conversion is quite beneficial to fetch a highly workable, technically superior and aesthetically charming websites. If you are about to start a business and looking for a WordPress website, it's the right time to start searching a perfect PSD to WordPress conversion provider. Mentioned below are some of the ways to meet the right conversion partner.

Turnaround Time

Turnaround time would be pivotal for the success of a vision which needs a workable website. If you go for WordPress conversion, turnaround time holds value as it puts you right in the front. Lesser the turnaround time, better for business and its future prospects; anything between 1-3 days would be a good turnaround time.

Pricing

Charges vary when PSD to WordPress conversion is sought, as varying degree of services and facilities are involved. Besides somewhat standard charges, the majority of conversion companies ask for additional payments on many occasion; charges vary when a favorable turnaround time is sought, when additional services are chosen, and when newer technologies are asked to be used.

Money Return

Money return is a policy which is applied by many WordPress conversion providers to serve the clients well. To avail this facility at the fullest, the best way would be to read the Terms & Conditions documents carefully. After all, this kind of facility serves more of provider's interests rather than the clients.

Payment Terms

Payment terms also vary in the WordPress conversion domain, as provides employ different tactics as per the need. Varying degree of payment terms include either paying 100% upfront, or paying a small percentage in advance, or paying almost half the amount before the starting of the work.

Medium of payment

As currency differs, so does the way of buying and selling, however, all such divergence must be sorted out well in advance. The medium & mode of payment however differ must be aligned to get the issue solved. Whether to accept cards or modern payment modes, all such issues must be sorted out to avoid being in any virtual mess.

Support after project delivery

Support after project delivery is a vital concern which should be dealt with a great care to get the best of benefits. In PSD to WordPress conversion, the support period can be anything between 30-60 days; however, the nature of support can vary big time due to time and location constraints.

Support during the development

Support during the development stage is another vital concern that is discuss during PSD to

WordPress conversion process. With this kind of support, the client always has the advantage of getting features, tools, options and facilities added anytime, as per the wish. If not offered, it can hamper the growth prospects of the business about to be launched.

Final demo

Final demo is equally important an aspect which enables clients to get in any changes before nodding for final delivery. If a WordPress conversion does not offer final demo facility, it means it does not offer the facility to bring changes at the last moments. After all, changes might be needed once the final demo is presented to the clients. If a provider does not allow this vital facility, the next available option must be chosen.
