How to make MOD file readable on Mac by [Ander Winger](#)

Article published on July 9th 2012 | [Software](#)

With the spread of camcorder using in our daily life, file format transfer become a hot problem among camcorder users, the most urgent users are JVC/Canon/Panasonic owner. Result for video created by these camcorder is stored in MOD or moi format. MOD is the file extension for the video file format used on many digital camcorders, such as the JVC Everio, and the Panasonic D-Snap SD-card camcorders. The bad idea is that mod file couldn't be recognized by Mac and other Apple portable devices. So that you have to convert MOD to MP4 or other formats compatible by Mac. Of course, MP4 as a popular video format is also a great target format. There is no trouble to convert MOD to MP3 Mac with MOD to MP4 converter Mac.

MOD to MP4 Converter Mac is an excellent tool to play and edit MOD files on Mac. It can convert JVC Everio/Canon FS/Panasonic D-Snap SD-Card recorded MOD files to the MP4 format to easily view/play on Mac with QuickTime, iTunes or Apple TV, import/edit with iMovie, Final Cut Express(FCE), Final Cut Pro(FCP) or transfer to iPod, iPhone, iPad, PSP, etc to watch on the move.

Here taking MOD files on Snow Leopard as an example to show mod to MP4 Mac.

1: Download and install Mac Mod to MP4 Converter

2. Load MOD video files.

Click "Add Files" and add the prepared MOD files. Multiple files can be loaded at one time under the batch conversion mode.

3. Set output file format.

Select "MPEG-4 Movie(\*mp4)" as the output file format from the "Profile" drop-down list.

4. Convert MOD to MP4 Mac.

After all the parameters are customized, hit "Convert" icon to convert MOD to MP4 to play/edit with QuickTime, iMovie.
