Install and enjoy- the popular Angry Birds for PC by [Maria Gini](#)

Article published on February 20th 2012 | [Software](#)

With ever increasing processing powers smartphones are capable of running very powerful apps for helping you in your work and recreation. One such app that has earned unprecedented popularity is the game of Angry Birds. This game was developed by the company named Rovio, a Finnish gaming developer, for iOS which is the operating system on Apple's™ devices. But the popularity of the game skyrocketed and soon it was made available for other devices and platforms. Angry birds pc version also was released soon. This has made you to enjoy the popular game on your laptop or desktop whenever you would like to have some recreation. Though there online sites that facilitate playing Angry Bird pc version, there is yet another way of getting the game on your pc, with the help of App Player developed by BlueStacks. This program can be installed on your Windows or Windows 7 platform which is most popular operating system powering the desktops and laptops.

The game of angry birds is popular because of the simple concept running the theme of this contest between comical featured angry birds and greedy pigs. You have to use a slingshot to hit and destroy all the pigs in the game who have stolen the eggs. But in spite of this simplicity, if you play angry birds on pc you will realize that the game with advanced levels and birds of special powers are going to be really addictive. Rovio has released many versions and advanced features and it has kept millions of the fans of angry birds satisfied with special features of the game. There is no wonder that, this game is ranked as the top of killer apps that are released so far.

You can play angry birds on pc as well as other apps from Android market if you get the free download of App Player from BlueStack. The game or the application App Player does not demand much of your resources, as they can be easily installed like any other program. The App Player, in fact provides you with interface for running many other Android apps on your PC.
