Internet Issues & Bellsouth Customer Support by [Kellymarion](#)

Article published on July 23rd 2012 | [Software](#)

As the Internet accessibility is taking a leap so is the Bellsouth Internet consumer-base. Though, the company has no more physical appearance after getting merged with AT & T in 2006, but yes, the name is there which stands for reliability and flawless online experience.

However, you can't deny from getting stuck into Internet related issues. Who to call or where to go is an important question that may puzzle you at times. But nothing to worry as Bellsouth Customer Support powered by AT & T and third-party service providers is available at the comfort of your home or office. Often their services are categorized as per the requirement, and may portray Internet setup and installation, router setup and configuration, network diagnostic and troubleshooting, browser optimization, virus and spyware removal, email setup and configuration, and more.

Excluding the initial setup and configuration which is on-site, the vendor offers online tech support for the rest. And you are just supposed to call the Bellsouth Customer Service over phone or push an electronic request. After getting connected with the helpdesk, you have to disclose the Internet related issues, and the specifications of your computer, browser, operating system, etc., experts will document each and everything in their customer relationship management software, and will go for the diagnostic phase. The obtained report is then analyzed by technicians to troubleshoot or fix the Internet issues.

Understanding the mutual dependency of the Internet, email client, web-based intranet apps, security software, browser, operating system, router and firewall settings, etc. it becomes vital to reach the background causes that in turn can pave the path of sensible PC or the Internet troubleshooting process. Hence, blaming the Bellsouth Internet connection for all is not at all justifiable. However, Bellsouth Support portal is benevolent enough to hold answers for all, and remember, you don't have to go anywhere, just call and get connected with the remote helpdesk, and your job is over. Experts will be taking care of each and every issue to leave your system in an error-free state.

Apart from that, being Internet users, you should also hold the expertise to diagnose and fix frequent issues. Most of the Internet issues can be resolved automatically by the Windows-based Internet or network diagnostic, Microsoft Fix It, Microsoft Update tools/features. Know-how pertaining to firewall, security, email, social network settings is also must. Online privacy breaching or e-threats are in the air, so you should be pretty much conscious about what you are sharing online, in general amalgamate professionalism in online behavior. Don't share too much, or don't post anything on the social networking sites including Facebook, LinkedIn, Google+, or others. Following email etiquettes is also worth, to avoid any security threats. A few standard ones include: (a) avoid attachments if you are not confirmed about their senders, (b) be careful with personal information while sharing message, (c) configure the privacy settings of your accounts, (d) while submitting your emails on any third-party websites, do confirm respective privacy or EULA policy, and more.

Thus, stay productive with the Bellsouth Internet connection!
