Windows 8 vs. OS X Mountain Lion by [Theodore Sumrall](#)

Article published on May 2nd 2012 | [Software](#)

Windows 8 and Mac OS X are operating system which has made the customers in a fix for selection. So here are some differences between them to make the selection least difficult -:

With new Mac OS X, it is easier to play desktops and I OS devices together. Also with this it is very simple to see, to make and to share documents from personal computers and mobile devices. With the help of clouding one can collect any data or presentation anywhere. The feature like Air Play mirror makes it possible to transfer a presentation made on Mac to the Apple TV while using an iPhone in meeting or elsewhere.

While talking about Windows 8, is enabled with inconspicuous Ecosystem which makes its design very impressive. Application chrome takes a minimal preview for interfacing purpose. This version of Windows is entirely different form earlier versions in all aspects like one of its enchanting feature is presence of Internet Explorer 10 with totally new look.

In Apple OS X there is a steadiness athwart devices. The hardware shows horizontal transitions of data and information with any Mac book, iPhone or iPad, which is not tilled now seen in Microsoft product hardware.

Windows 8 has a unique feature that it is optimized for both Personal computers and tablets.

With Mac if one wants to run latest operating system from Apple then has to find new Mac for that, but Windows 8 is easily compatible with the system with Windows 7 or Vista. Only a mere upgrade can make this thing possible.

By lion Developers iCloud is available for automatic synchronizing for all basic applications. Along with this fast access to work, messages reminders with iPhone, iMac and iPad possible automatically. But also in Windows 8 there is better and improved cloud integration by making synchronization with new Windows store. One can integrate messenger, applications, photos etc with any device with application like Sky Drive.

Mountain Lion has added a share button to add many core applications so that a person can connect other through mail, messages or social third party networking sites. But this share button is for now to limited use. In Windows 8 there is no share button but there sharing properties are almost similar to that of Mac OS X.

So by using the features above mentioned one can decide to select desired operating system and operating machine.
