Worthy Reasons to Export Outlook Express to Lotus Notes Email Client by [Stephen Charles](#)

Article published on July 17th 2012 | [Software](#)

There are times when the organizations take a leap towards development which includes changes in the working pattern, email clients used and etc. Small ideas have rarely developed something big and hence, with small email client's users are always surrounded by bounds and limitations that cannot be crossed, which mean users cannot explore anything new. And in order to alleviate yourself from work load you must work on an email client that is technologically sound than the Outlook Express program like; MS Outlook, Lotus Notes email program, etc but more preferably; one must opt for Lotus Notes as it not only serves high-end emailing components but is also considered as one of the safest server based email clients. When you export Outlook Express to Lotus Notes make sure that you are using a reliable and secure end software application that proves to be a usable EML to NSF Converter by transferring your EML data intactly as it is into NSF file format.

### Time To Export Outlook Express To Lotus Notes!

When you are being confronted with baffling choices as to choose an easy emailing platform with less components or a server based client with several components and benefits; you would obviously opt for Lotus Notes over Outlook Express due to the highly substantial interface with which it has been built with.

Some of the Lotus Notes client benefits that tempt users to export Outlook Express to Lotus Notes have been discussed below:

**One Of The Best Security:** Lotus Notes email application is renowned amongst highly preferred email clients for the topnotch security measures provided by the application and hence, it goes without saying that the Domino Server operated Lotus Notes email client serves its users with a high level of database security.

**Workflow Can Be Routed:** The direction of the workflow is absolutely routed which permits the users to work on the same document at a time with the ability of posting comments to it also.

**Database Sharing Via Server:** Being a server based email client; Lotus Notes allows its users to share database with other Server users with the ability provided that the users can modifying the replica of the original database shared without hampering the integrity of the original copy of the database.

**EML To NSF Converter:** The users can export Outlook Express to Lotus Notes with a secure application like the EML to NSF converter without experiencing complications or hang-ups in the procedure because the backend interface of the software is precisely designed with the apt technology.
