Electric Golf Trolleys for Golfers by [Joy Shiela](#)

Article published on January 24th 2012 | [Sports](#)

People invent from need or to simply make life easier. Golfers for instance, treat electric golf trolleys as a convenient way to help them play. Since golfers need to bring their tools in heavy bags, they usually get tired and stressed out. Other golf players hire someone just to bring their golf bags for them or leave their extra clubs and golf bags at the golf cart.

But for golfers who prefers to bring their own golf bag and golf clubs on their own, this could add stress and poor performance on the player. For this reason, electric golf trolleys were invented. With this invention, golf bags can be safely tucked on these trolleys thus making all the golf clubs safe and secure. And these trolleys can be safely stored because they're compact in design. The golfer then will don't have anything else to worry about but improving his performance and his swing.

Because electric golf trolleys have a very powerful motor and an enduring battery that can give 180 watts of power enough to cover a distance of up to 20km, it is truly what every golfer needs. After recharging, the trolley can be utilized for another 6 to 10 hours more. The trolley's parts are made easily available in case of repair or replacement needs. Some models have dedicated a specific section to accommodate the clubs and many water bottles. Some trolleys are also designed with an umbrella to cover the clubs in case of rain.

A lot of models are available and it can cost anywhere around \$150 or as much as \$500. The prices of the trolleys vary from model to model and brand. But even if these prices are quite expensive for a few, the advantages greatly far outweigh the price. These golf trolleys are categorized into the manual and the automated types. The automatic type comes with a handheld remote control apparatus that will make the whole game effortless. Unmanned and uncontrollable trolleys are the thing of the past, as this type features an efficient brake system. Gurantees can be generously offered at 2 years and some brands also provide giveaways in their package such as batteries, parts and other manuals.
