SkyCaddie SG5 – the Smart Choice [by Johnson Jonni](#)

Article published on February 7th 2012 | [Sports](#)

Things change with time – and some of the changes to the original stuff turn into something more exciting, making it extraordinary. These are the game changers, literally, which make such a valued addition to the game that the game itself becomes exciting, and in this case scientific. Such is the difference made to the game of Golf with the advent of SkyCaddie SG5 that the game of Golf is not the same as it was. Technology has powered many a sport, adding the scientific edge to it in such a way that the game tends to become more professional and marked with unique expertise. The SkyCaddie SG5 GPS rangefinder makes a complete and comprehensive map of the golf course that even amateurs and those who are still in the learning curve have so much to gain, as the professionals of the sport do.

The SkyCaddie, now one of the most essential aspects of the sport, comes in different options with various features in line with the requirements on the golf course, including the SkyCaddie SGX, SG2.5 and SkyCaddie SG5. The gadget includes a rechargeable lithium ion battery, A/c battery charger, USB cable and a heavy duty belt clip, along with a comprehensive quick start guide for you to hit the ground running. The display in SkyCaddie SG5 features a high resolution 2.2 inch backlit colour LCD screen, which, along with the IntelliGreen Pro, displays the chief aspects of the ground such as colour variations, false fronts and contours, keeping you constantly informed of what lies ahead.

The SkyCaddie SG5 is an intelligent companion when you are on the move, letting you, for instance, know precisely how far you managed to hit the ball. With simple controls, you would be able to know how much the ball has travelled with each of your clubs, and hence, lets you have better control over the game with right choices in good time. The smart gadget constantly updates your screen with the hazards between you and the green, even as the hazards that you have gone past are removed off the screen, leaving you with just the information that you need. It would help if you knew for sure that you bought the SkyCaddie SG5 from reliable sources and from authentic sellers, as you would get the full quota of uninterrupted services only when you have bought your gadget from the right places. Once you are done with it, you could leave the rest to your smart companion.
